

MANTERO | 1902
FALL/WINTER 2023

c r o s s i n g b o u n d a r i e s

Boundaries and limits... become obstacles for us to cross.

It's time to go beyond predefined settings and be open to something new: a more fluid and relaxed allure, a healthy predisposition to lightness of mind and irony.

The fall-winter 2023 collection is designed for women who love to experiment and wear male-shaped silhouettes adding a touch of femininity given by details, motifs, colours, and a selection of transparent and rough, bright, and flowing fabrics.

The Mantero woman is unintentionally "sexy". She is feminine - softer shapes and lines, ruffles, openings, slits combine to create a new collection trend.

Prints are airier, and easier to match. The geometries designed for scarves combine with shaded flowers, and classic archive flowers. Their intrinsic strength is given by the design's stroke, strong and bold colours ranging from violet to peach, combined with ochre and bright green.

Finally, the addition of a new category enriches and completes this winter's collection - knitwear. Our knitted products, customised with colour blocking, shades and prints, "interact" through shapes, colours, and textures with the rest of the collection.

Enjoy!

PRINTS

DREAM SHADES

"There are flowers everywhere for those who want to see them" H. Matisse

Like in a dream or a vision, colour patches alternate in space and create a surreal floral meadow. The shapes are gentle and nuanced but the colours are strong, vivid, and unexpected.

A combination that fascinates and makes the mind travel in its most abstract dimension.

FATALE

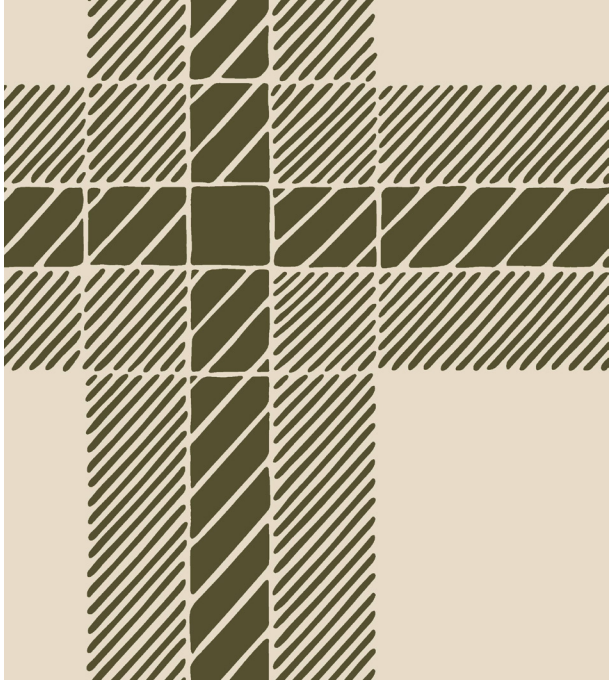

Fatale (irresistible) - like love at first sight, that deep gaze with which a person falls in love.

Lilies, tulips and carnations cascade through space creating a full and dynamic floral motif, the graphic legacy of a 1980s Mantero scarf.

Its alter ego is a small animalier motif which imitates its sinuous movement, giving shape to a refined and irresistible combination - Fatale.

PRINTS

**LINED-UP**

The scarf shape par excellence - the square is de-structured and re-structured from a 1960s Bianchini Ferrier studio design. The result leads to precise patterns adapted ad hoc to garments, or to a re-interpreted madras pattern.

The stripes effect is underlined and strengthened by a bold and iconic choice of colours, poised between past and future.
